

General IS Topics

Description of the Track

The General IS Topics track is intended for high-quality papers on topics that do not have a specific fit with other tracks, such as Project Management, Digital and Social Inclusion, Value of Information Systems, Diversity, Ageing Research and Resource Based Approach. The track aims to attract unique and novel papers and give an additional degree of freedom to the conference's theme, either from an epistemological, ontological or methodological perspective. Novel research is welcome including, prototypes, pilots, case studies and the full range of research methods adopted within the IS discipline. Please check the detailed descriptions of other tracks before submitting your paper to this track to ensure a good fit with your submission.

The General Topics track is also the track to which chairs of other tracks are welcome to submit.

A range of contributions are sought including full research papers and research in progress papers.

Publishing Opportunities in Leading Journals

Track Co-Chairs

1	Name - Surname (primary contact)	Gustaf Juell-Skielse
	Title	Associate Professor
	E-mail	gjs@dsv.su.se
